

Oracle Learning Subscriptions

- 12 months of 24/7 access to a comprehensive set of training videos and product demonstrations
- Training delivered by Oracle experts
- Practice with hands-on labs
- Access to instructors to get answers to your questions
- Dynamic updates for new features and product enhancements direct from product development

WHICH LEARNING SUBSCRIPTIONS DOES ORACLE OFFER?

Oracle learning subscriptions are valid per user per year. A user can specify a specific technological stream they wish to learn, or, should their learning straddle multiple disciplines there is an option to purchase an "unlimited learning subscription" which gives access to a much wider portfolio.

Before committing to any learning subscription we recommend a TNA (Training Needs Analysis) so that we can assure the correct learning path for your team.

We also recommend our "enhanced learning" solution to ensure true value from the learning experience. For more information visit our website or arrange a meeting to discuss with our Education Consultants.
